A. Pooled fit (n = 62,300 years, 30 seeds, R² = 0.48)
B. Per-mechanism fits (no mechanism dummies)
mean |miss| × 2.72 (ln miss + 1)
off-pad share + 0.1
pad radius + 10 m
pad standoff + 1 km
keep-out radius + 1 km
stand-down + 1 h
night share + 0.15
reference utilisation + 0.01
ln miss × standoff (+1 × +1 km)
ln miss × utilisation (+1 × +0.01)
keep-out × stand-down (+1 km × +1 h)
keep-out × utilisation (+1 km × +0.01)
stand-down × utilisation (+1 h × +0.01)
standoff × utilisation (+1 km × +0.01)
pooled greedy vs in-house
batched assignment vs in-house
marketplace vs in-house
